Celebrate the first year

*Make a child feel special
with their own video*

Edit your family videos

One of the best decisions I ever made was to hire Tears of Joy Video to create our 'family videos'. Not only did they do a great job, but working with them was incredibly easy! No kidding here... I simply mailed all my videos and pictures and they worked their magic. They did such a great job that I hired them again a year or so later... and I'm basically planning on having them create a new video for us every year or so. Everyone loves the videos, especially our children and it's one of the best investments I've ever made."
